

Wildwood Water Utility
Water Application Instructions
Residential 1-2 units.

The Water Application consists of a general information section and a calculation sheet. It is important that all the information is completed accurately. This information will be used by our staff to determine the proper sizing of your water service.

For Residential applications it is recommended that you have your Licensed Plumber Complete the worksheet.

The completed and signed application and work sheet are to be returned to the Wildwood Water Utility Payment office located at 3416 Park Boulevard, Wildwood, NJ. We require the original application and worksheet. Electronic applications will not be accepted.

Fees:

1. A Non-Refundable Application Fee of \$200.00 shall accompany the completed application.
2. Upon acceptance and return of the approval letter a \$3,800.00 connection fee **per unit** will be due and payable.
3. Prior to the actual connection to the water service a \$3,800.00 Tapping Fee **per unit** will be due and payable. The tapping fee is to cover the costs of opening and restoring the road, road opening permits, installing the meter, pit and all related equipment. This cost can vary depending on the installation. The cost of tapping will be estimated by our staff and included in your approval letter.

Once your completed application is received our staff will review it for completeness. Our installation crew will visit the site to determine what work will be required to install you water service(s).

Once all the information is gathered a determination will be made and communicated to you in a letter.

Please contact us at 609-846-0600 and ask for John Beach if you have any questions.

Application Fee \$200.00

Application for Water Service 1-2 Residential Units

Keith Lamb,
Utility Director

Phone: 609-846-0600

Application is being made for water service, subject to the rules, rates and regulations of the Water Utility, which I am acquainted. I agree to pay the quarterly charges thereafter from year to year until the ownership is either transferred or terminated. All transfers or termination must be provided in writing.

The application will expire six months from the date of issuance of the approved Water Commitment if either the tap has not been scheduled or other prerequisite conditions have not been met. The application will be reviewed within four (4) weeks.
